

VIDOL CHALAMOV

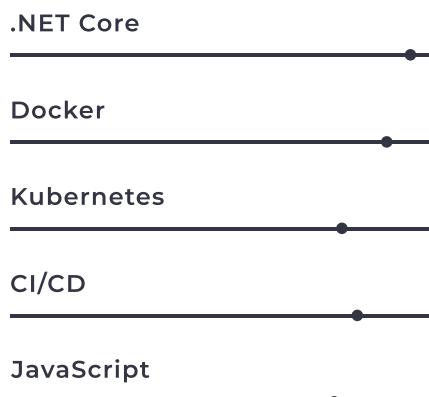

Software Engineer

I consider myself a highly motivated and open-minded individual who is always ready for the next challenge. My experience is backed up by multiple small, medium and enterprise projects, where agility and quick learning were key factors in the success. When approaching new technologies and ideas, there is always curiosity and striving to achieve excellence.

SKILL

WORK EXPERIENCE

● PRIME HOLDING

Senior Software Engineer / 06.2020 - Present

Practising mentoring activities with Junior and Regular developers. Taking part in the designing process of large scale projects as well as being part of business meetings. Taking part in Project evaluation and estimation.

● Regular Software Engineer / 04.2018 - 06.2020

Being part of multiple designing, creation and execution of large scale projects, as well as various Proofs-of-concept for several clients. Working with the latest web development technologies such as ASP.NET Core, React, Angular. Extensive work with DevOps technologies such as Kubernetes, Jenkins, Docker and Groovy.

● Junior Software Engineer / 09.2016 - 04.2018

Using technologies such as .NET Core, SQL Server, Salesforce and more JavaScript. Working on complex legacy projects for large scale clients. Rewriting complex code generation system, composing test and deploy scenarios, running benchmarks.

● Intern Software Engineer / 06.2016 - 09.2016

Development of Console and ASP.NET Applications using a variety of database engines and 3rd party libraries. The main purpose of the internship was to get the interns up to speed with the latest technologies and to introduce us to a typical work environment.

EDUCATION

● UNIVERSITY OF PLOVDIV

Software technology and design / 2015-2019

Studying wide range of technologies including Java, PHP and C#. This was the foundation and really the begining of all my professional successes.
